

## Safety Instructions

Please read all instructions thoroughly before using this product. Barumi is not responsible for damages caused by natural disasters (earthquakes, lightning, fires, etc.) or users' negligence (improper installation or use of this product).

**DANGER** Any negligence, improper use or improper installation of this product may result in serious injury, death and/or property damage.

- Do not use gray water or industrial water as the water supply. Ne pas utiliser d'eau usée ou industrielle.
- Self-disassembly, repair or modification of the product is strictly prohibited. Ne jamais démonter, réparer ou modifier.
- Keep combustibles, such as cigarettes, away from the product. Tenez à l'écart des produits inflammables tels que les cigarettes.
- Do not bend or crush the hose. It may cause water leakage. Ne pliez pas et n'écrasez pas le tuyau de raccordement. Cela peut provoquer des fuites d'eau.
- When cleaning the product, remove the power plug. Spraying a chemical solution directly on the product or using a rough cloth may damage the product. Lors du nettoyage du produit, débranchez la prise d'alimentation. La pulvérisation de solutions chimiques directement sur le produit ou l'utilisation d'un chiffon rugueux peut endommager le produit.
- If the product is used by children, the elderly, users with sensitive or weak skin, or someone who has difficulty controlling the temperature, set the water and seat temperature to "Low". Otherwise, there is a risk of low-temperature burns. Les enfants, les personnes âgées, ceux qui ne peuvent pas contrôler la température eux-mêmes et ceux qui ont la peau sensible doivent régler la "basse" température de l'eau chaude et du siège des toilettes. Il peut y avoir un risque de brûlures à basse température.
- "Low-temperature burn" refers to burns caused by exposure to a temperature of 104°F for a long time. "La 'brûlure à basse température' désigne les brûlures causées par un contact de longue durée à 104°F.
- Do not place or store the product where it can fall or be pulled into the tub or sink. Ne placez pas et ne stockez pas le produit dans un endroit où il pourra tomber ou entrer dans la baignoire.
- If the product becomes submerged, unplug it immediately and do not reach into the water. Si le produit est tombé dans l'eau, débranchez-le immédiatement et ne touchez pas l'eau.
- When lightning strikes, unplug the power cord. Débranchez la prise d'alimentation pendant les orages.
- Keep the power cord away from heated surfaces or hot objects. Si le produit est tombé dans l'eau, débranchez-le immédiatement et ne touchez pas l'eau.
- Remove dust and water from the power plug, and plug it firmly into the outlet. Enlevez la poussière et l'eau de la prise d'alimentation et insérez-la fermement jusqu'à la prise femelle.
- If the product is malfunctioning, unplug the power cord immediately and call Barumi. En cas de dysfonctionnement du produit, ne l'utilisez pas. Débranchez la prise d'alimentation et contactez Barumi.
- Do not pull the power cord or touch the power plug with wet hands. Ne tirez pas le cordon d'alimentation et ne touchez pas la prise d'alimentation avec les mains mouillées.

1

- If the power cord is damaged, call Barumi for a replacement. Si le cordon d'alimentation est endommagé, contactez Barumi pour le remplacement.
- Self-disassembly, repair or modification of the product is strictly prohibited. Ne jamais démonter, réparer ou modifier.
- Keep combustibles, such as cigarettes, away from the product. Tenez à l'écart des produits inflammables tels que les cigarettes.
- Do not sleep while sitting on this product. Do not use the product if you are drowsy or have taken any medication that accompanies drowsiness. Ne dormez pas en étant assis sur ce produit. N'utilisez pas le produit si vous avez sommeil ou si vous prenez des médicaments qui peuvent vous rendre le sommeil.
- This product is not intended for outdoor use. It is for indoor use only. Ce produit n'est pas destiné à une utilisation extérieure. C'est pour une utilisation intérieure uniquement.
- Do not pour a large amount of water on the product. Ne versez pas de grandes quantités d'eau sur ce produit.
- Do not use a steam cleaner on this product. N'utilisez pas de nettoyeur à vapeur sur ce produit.
- Do not lean on the lid as it may damage the product. Ne vous appuyez pas sur le couvercle car cela pourrait endommager le produit.
- After installation, make sure that there is no leakage at the water supply connection. Après l'installation, assurez-vous de vérifier que la partie du raccordement de l'alimentation en eau ne fuit pas.
- If the product has not been used for a long period of time, disconnect the power cord and drain the water tank. Old tank water can cause skin irritation. Lorsqu'il n'est pas utilisé pendant une longue durée, vidangez l'eau et débranchez la prise d'alimentation. L'eau se détériore et cela provoque une irritation de la peau.
- When lightning strikes, unplug the power cord. Débranchez la prise d'alimentation pendant les orages.
- Make sure the temperature in the bathroom does not drop below 0°F due to a risk of freezing. Use a heater to warm the bathroom. Assurez-vous que la température dans la salle de bain ne descende pas en dessous de zéro. Il y a un risque de congélation. Pour garder la salle de bain au chaud, utilisez un radiateur.
- Connect the product to a properly grounded, 120V power outlet. If you are unsure with grounding condition or do not have a GFCI outlet, contact a qualified electrician to have one installed. Ce produit doit être connecté à une prise d'alimentation 120V correctement mise à la terre. En cas de doute ou si vous n'avez pas de prise mise à la terre ou GFCI, consultez un électricien qualifié pour l'installer.
- Do not expose the product to direct sunlight. Évitez la lumière directe du soleil.
- Unplug the power cord before removing the product from the toilet. Débranchez le cordon d'alimentation avant de retirer le produit de la cuvette des toilettes.
- Do not use a power supply or wiring equipment that exceeds the specified rating. N'utilisez pas d'alimentation électrique ou d'équipement de câblage dont la valeur nominale est supérieure à celle spécifiée.

## BEFORE YOU BEGIN

### WHAT TO EXPECT DURING INSTALLATION THE 3 MAIN STEPS.

**STEP 1 PREPARE!**

**REMOVE THE CURRENT TOILET SEAT**

- Unfasten the nut and remove the toilet seat.

**STEP 2 INSTALL!**

**THE BASE BRACKET MUST BE INSTALLED PROPERLY**

**POSITIONING THE BASE BRACKET**

1. Firmly push the rubber inserts into the toilet seat holes and the main body. PLEASE NOTE: Please make sure each screw is spaced evenly around the base bracket.

2. Align the base bracket with the toilet seat holes. Turn the water supply valve clockwise to allow water flow.

3. Install the following parts to the base bracket, in this order—bracket inserts then screws. PLEASE NOTE: Please make sure each screw is spaced evenly around the base bracket.

4. Insert the remote controller into the hanger from the top. Turn the water supply valve clockwise to allow water flow.

**STEP 3 CONNECT!**

**CONNECT TO YOUR BATHROOM OUTLET (BEST OPTION)**

- Shut off the water valve.
- Drain the toilet tank.
- Disconnect the hose.

**IF OUTLET NOT AVAILABLE**

If your bathroom is not equipped with a grounded electrical outlet (GFCI), plug your power cord into it to turn the bidet on.

**OPERATION CHECK**

- Turn the water supply valve clockwise to check for water leakage.
- Check the operation of each function.

## INSTALLATION PROCEDURE

**02 Remove the existing toilet seat**

**How to connect (pair) the remote controller**

- Pairing must be done within 1 minute of plugging in the power cord. If 1 minute passes, please unplug and replug the power cord and try again.
- Use a coin to turn in the direction of the arrow to open the cover.
- Insert the 3 AAA batteries (provided) as shown below.
- Close the cover by turning it to the 1 o'clock position (tools other than coins can cause damage when opening and closing the cover).
- To connect (pair) the remote controller:
  - Press and hold the STOP button for at least 3 seconds.
  - Pairing successful after "beep" sound and LED turns on.

**03 Install the T-valve**

Install the T-valve as shown.

**04 Connect the flexible hose**

Connect the flexible hose to the T-valve and the main body.

**05 Insert bidet body**

Insert the main bidet body into the groove on the installed base bracket until the fastening hooks "click".

**06 Mounting the remote controller**

How to mount the remote controller

- Choose a location to mount the remote controller + hanger and remove any moisture or debris from the surface.
- Turn the water supply valve.
- Insert the remote controller into the hanger from the top.

**07 Connect the power cord**

Plug the power cord into a grounded electrical outlet. If there is no outlet, use a grounded extension power cord.

**08 Connecting (pairing) the remote controller**

**PARTS NAMES**

1. The distance from the center of the fixing hole to the front of the toilet bowl must be at least 18.5".

2. The distance from the toilet tank to the center of the fixing hole must be at least 1.8" (recommended distance is 2.4").

3. The distance between the center of both fixing holes must be within the range of 5.5" - 7.8".

## OPERATION GUIDE

**How to connect the remote controller (pairing)**

1. Pairing must be made within 1 minute after supplying power (insert AAA batteries into remote control first).
2. Press and hold the Stop button for at least 3 seconds.
3. Pairing is completed when you hear a "beep" buzzer and the remote control LED is on.

**STOP**  
• Press once to stop the operation.  
• Press twice to operate automatic nozzle cleaning function.

**ECO**  
Minimizes power use by adjusting water temp., seat temp., and dry air temp.  
• Press once for LEVEL 1: When the product is not in use, water temp. and seat temp. remains at standard economy mode.  
• Press twice for LEVEL 2: When the product is not in use, water temp. and seat temp. remain at extra economy mode.

**REAR**  
• Press once for rear cleaning.  
• Press twice for nozzle oscillating movement for massaging effect.  
Press again to stop cleaning function.

**FRONT**  
• Press once for front cleaning for ladies.  
• Press twice for nozzle oscillating movement for massaging effect.  
Press again to stop cleaning function.

**WATER PRESSURE**  
3 levels of water pressure

**WATER TEMPERATURE**  
3 levels of water temperature  
Press 4th time to turn off.

**SEAT TEMP. / DRY TEMP.**  
3 levels of seat and air dry temperature  
Press 4th time to turn off.

**CHILD/MASSAGE**  
• Press once: child mode.  
Child mode provides 30 seconds of wash and 1 minute of dry.  
• Press twice for massaging effect.  
Massaging with water helps with bowel movements.

**DRY**  
Press to activate air dryer.

10

**3. Filter mesh cleaning (water supply must be shut off)**

- Close the water supply valve and disconnect the flexible hose.
- Clean the filter mesh at both sides of the hose with a brush.
- Reconnect the flexible hose.

**4. Detaching the bidet toilet seat**

To detach the bidet toilet seat, hold both sides and pull it forward while pressing the release button located on the right side of the unit.

**5. Clean thoroughly**

Remove the bidet toilet seat and clean thoroughly.

**6. Reattaching the bidet toilet seat**

To reattach the bidet toilet seat, align the center of the unit with the center of the base bracket and slide the body backwards until you hear a "click" sound.

**MAINTENANCE**

**HOW TO CLEAN THE PRODUCT**

- 1. Cleaning the exterior part of the bidet toilet seat**  
Wipe the exterior part of the bidet with a soft sponge or cloth soaked with neutral detergent. Do not use hydrochloric detergent, thinner, benzene, lubricant, sandpaper, or insecticide, etc. as it may cause damage to your bidet.
- 2. Spray wand cleaning (manual)**  
When the user is not seated, press the REAR button to eject the spray wand. Lightly wipe the spray wand with a soft sponge or a toothbrush soaked with dish soap. After cleaning, press the REAR button again or press the STOP button to restore the spray wand to its initial position.  
\* Do not bend or pull the spray wand with excessive force, as this may cause damage.

**CARING FOR YOUR BIDET IF YOU WON'T USE IT FOR A LONG TIME.**  
Please take these necessary steps to preserve your bidet during non-use.

**Drain the tank water and cut off the power**  
Scan QR Code to download the EF-BM-6000 User Manual for more details.

**Winter Care (for cold climates)**  
• Your bidet should be connected to power even if you temporarily stop using the product.  
• Set the hot water temperature on the control panel to at least "Low".  
• This can help prevent the tank water from freezing.

11

12

**3. Filter mesh cleaning (water supply must be shut off)**

- Close the water supply valve and disconnect the flexible hose.
- Clean the filter mesh at both sides of the hose with a brush.
- Reconnect the flexible hose.

**4. Detaching the bidet toilet seat**

To detach the bidet toilet seat, hold both sides and pull it forward while pressing the release button located on the right side of the unit.

**5. Clean thoroughly**

Remove the bidet toilet seat and clean thoroughly.

**6. Reattaching the bidet toilet seat**

To reattach the bidet toilet seat, align the center of the unit with the center of the base bracket and slide the body backwards until you hear a "click" sound.

**MAINTENANCE**

**HOW TO CLEAN THE PRODUCT**

- 1. Cleaning the exterior part of the bidet toilet seat**  
Wipe the exterior part of the bidet with a soft sponge or cloth soaked with neutral detergent. Do not use hydrochloric detergent, thinner, benzene, lubricant, sandpaper, or insecticide, etc. as it may cause damage to your bidet.
- 2. Spray wand cleaning (manual)**  
When the user is not seated, press the REAR button to eject the spray wand. Lightly wipe the spray wand with a soft sponge or a toothbrush soaked with dish soap. After cleaning, press the REAR button again or press the STOP button to restore the spray wand to its initial position.  
\* Do not bend or pull the spray wand with excessive force, as this may cause damage.

**CARING FOR YOUR BIDET IF YOU WON'T USE IT FOR A LONG TIME.**

## TROUBLESHOOTING

If the product is not operating properly, please refer to the following possible solutions.

Problem	Possible Cause(s)	Solution
Heated seat	Is the seat temperature set too low or is it turned off?	Adjust the seat temperature on the control panel
Power supply	Is the product in Power-Save mode?	Press the ECO button
Wash	The seat does not warm up	Is the power turned off? Or is the circuit breaker turned off? Wait until the power is restored, or turn on the circuit breaker
Dry	The unit is not working	Is the power turned off? Or is the circuit breaker turned off? Wait until the power is restored, or turn on the circuit breaker
Seat sensor	The REAR function operates without user detection on the seat	Is there water residue or a wet towel on the seat? Wipe off the water residue or remove the wet towel
REAR / FRONT wash functions	All 3 WATER PRESSURE lights blink simultaneously	There is no water inside the water tank 1. Press the REAR button to supply water 2. If all 3 WATER PRESSURE lights still blink 1 minute after the user presses the REAR button, it indicates that the water tank is still not filled up with water 3. If water is not supplied even when the water supply valve is opened, unplug the power cord from the socket and contact Barumi
Power save	Water pressure is weak	Is the water pressure too low? Increase the water pressure
Water is cold	Is the strainer clogged? Is the temperature set too low or is the unit turned off? Is it in Power-Save mode?	Clean the strainer Adjust the water temperature on the control panel Press the ECO button
Water spray stops during use	Cleaning stops 90 seconds after pressing REAR/FRTN buttons	Press REAR/FRTN again
Product warranty card	All 3 WATER TEMP. lights blink, makes a "beeping" sound	Overheated water tank Reset the Power-Save mode by pushing the ECO button on the control panel
Industry Canada:	1 WATER TEMP. light blinks	Overheated water tank Malfunction of water temperature sensor
Canada, avis d'Industrie Canada (IC)	3 SEAT LEVEL lights blink	Overheated seat Contact Barumi Support
Product warranty card	1 SEAT LEVEL light blinks	Overheated water tank Malfunction of seat temperature sensor
Industry Canada:	Both LEVEL1 and LEVEL2 ECO lights blink simultaneously	Check the position of the seat sensor (refer to P9) The seat sensor isn't detecting human contact Contact Barumi Support

## FCC COMPLIANCE STATEMENT

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and  
(2) this device must accept any interference received, including interference that may cause undesired operation.

**NOTE:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**FCC Caution:** Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

**Industry Canada:** This device complies with Industry Canada licence exempt RSS standards. Operation is subject to the following two conditions:  
(1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

**Canada, avis d'Industrie Canada (IC)** Cet appareil est conforme aux normes RSS exemptes de l'Industrie Canada. Son utilisation est soumise aux deux conditions suivantes : (1) cet appareil n'engendre pas d'interférences, et (2) cet appareil doit tolérer tout type d'interférences, notamment les interférences pouvant provoquer une utilisation non désirée de l'appareil.

**WARNING** This product is solely intended for households or household-like environments. Read all instructions and guidelines thoroughly before installation. User should have access to this User Manual at all times during installation and operation. For product improvement, designs and specifications are subject to change without prior notice.
